EDUCATION

Tufts University Expected May 2028
B.S. in Mechanical Engineering, Minor in Computer Science
GPA: 3.86/4.00, Dean's List all semesters
Relevant courses: Thermal Fluid Systems, Materials and Manufacturing, Mechanics, Data Structures

EXPERIENCE

Oxipital AI Bedford, MA
Mechanical Engineering Intern Summer 2025

- Developed electromechanical components for an automated industrial quality inspection system
- Designed, prototyped, and sourced manufacturing for two silicone camera lens caps
- Performed SolidWorks structural and thermal FEA on parts to assess durability
- Led design reviews with a cross-functional team, discussing designs and manufacturing options

MassRobotics Boston, MA
Intern at resident startups: Boundless Robotics, Ubiros, Vision Cycle Summers 2023-2024

- Manufactured and tested consumer-grade hydroponic and soft-gripping robots
- Optimized assembly and QC procedures to improve production efficiency and consistency
- Created new assembly and testing documentation following set formats and procedures
- Applied computer vision software and Arduino scripts to train and validate systems

ACTIVITIES

Tufts FSAE Electric Racing Team Medford, MA
Chassis Project Lead June 2025 - Present

- Lead a team of undergraduates to design a steel-tube chassis for a Formula SAE electric race car
- Collaborate with subsystem leads to integrate and package mechanical and electrical components
- Teach members how to use weldments and static FEA tools in OnShape and SolidWorks

Packaging Team September 2024 - May 2025

- Packaged mechanical components within the vehicle, maximizing space efficiency and accessibility
- Designed and manufactured mounts for the low-voltage battery, chain guard, and sheet metal seat

Tufts Robotics Club Medford, MA
Battlebots Team Member September 2024 - May 2025

- Designed and built a 4-lb battlebot with a sheet metal exterior and servo-actuated flipper weapon
- Earned Best Craftsmanship Award among 20 teams at the Tufts Battlebot Competition

SKILLS

Programming: MATLAB, C++, Python, Java, HTML, object-oriented programming
CAD: SolidWorks, Onshape (part design, FEA, engineering drawings)
Manufacturing: 3D printing, laser-cutting, mill, lathe, water jet, band saw
